## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. **Claims 1-7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement.**

Claims 1-7 contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Specifically, claim 1 recites (1) a subscriber device including a subscriber loop interface circuit (SLIC). Claim 1 further recites (2) that the subscriber device has a resistance between 100 and 400 ohms and operates in the current range of 20mA to 30mA. On one hand, the subscriber device of claim 1 appears to refer to a cable modem as described on page 1, lines 15-17, of the specification. On the other hand, the device is described in terms of analog telephone standards as set forth on page 7, lines 15-21, of the specification. Clearly the device cannot both be a cable modem and telephone.

Furthermore, claim 1 recites "subscriber telephony means having said SLIC incorporated in proximity thereto." It is understood that the "subscriber telephony means" refers to, for example, a telephone. Telephones are remotely powered by a SLIC, therefore, it is not understood how a SLIC could be incorporated in proximity with a telephone. This language suggests an integration of a SLIC and phone, while this is

clearly not disclosed. See page 1, lines 19-21, page 7 and page 8, lines 14-15, of the specification.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. **Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.**

**Claims 1-7** recite the word "means" preceded by the words "subscriber telephony" in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function is specified by the word(s) preceding "means," it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. **Claims 13-17 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boudreax, Jr. (US Patent 6,668,060) in view of Anderson et al. (US Patent 6,728,370).**

**Claims 13-17 and 23** are rejected for the same reasons previously presented in the Non-Final Office Action filed 23 March 2006. Therefore, Boudreax in view of Anderson makes obvious all limitations of the claims.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's arguments with respect to claims 13-17 and 23 fail to comply with 37 CFR 1.111(b) because they amount to a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
